Obturers	One Shape Gutta Percha	NA		Designed to match the shape created with the GT Series X series files. Flexibility allows for filling of even the most challenging anatomy Single insertion.	Flexible GT Obturators are designed to match the shape created with the GT Series File.	ProTaper Universal obturators are precision matched to fit the shapes created by ProTaper Universal files.ProTaper Universal Absorbent Points Points come sterilized in five sizes to fit all ProTaper Universal-prepared canals and are color-coded.	ProTaper Next Obturators & GP PointsPROTAPER NEXT® Absorbent Points These absorbent points come sterilized in five sizes to fit all PROTAPER NEXT®-prepared canals and are color-coded for easy recognition and convenience. PROTAPER NEXT® Gutta-Percha Points Mirror the tapered design files for system-based efficiency.	The new Revo-5™ gP Points perfectly matching the Revo-5™ files Paper Points! perfectly matches canals shaped with Revo-5™ files	Active GP Plus and Activated Gutta Percha Surface.Use a matching hand file to place sealer in the canal, coat the Activ GP point and slowly insert the point into the canal.	BC Sealer and Matching BC Points	TF® Gutta Percha Points are designed to the TF apical file preparations.
